Profile

I am a tech-driven individual, a responsible, and committed software engineer, with an a-get-it-done, on-time and high-quality product spirit to implement and deliver front-end and unique web applications using different programming languages and technologies.

Projects

Quiz ↗
This is a website I developed using the javascript library React. The website gives the user questions with categories for the questions to be answered.

Hacker-news ↗
This is a website built using a javascript library react. It shows articles about programming subjects on search.

Weather App ↗
This is a javascript website that shows the weather of any city around the world. It utilizes open weather API to fetch the weather data.

Education

Diploma in Computer Science, *Kitale National Polytechnic*   2017-05 – 2019-11 | Kitale, Kenya

Software Engineering, *Moringa School* ↗   2021-10 – 2022-05 | Nairobi, Kenya

Hobbies

Cooking
This allows improvement in logical coding and details.

Physical activities
I take a walk to refresh myself as I ponder on the bug I encountered.

Professional Experience

Front-end Developer intern, *SkillReactor* ↗   2022-10 – 2022-12
I was tasked to develop real-world projects to gain experience. I was able to gain experience as I was building projects.
